

***Lowland deer in Scotland –
changing times; new challenges***

Membership

What does LDNS offer?

The Lowland Deer Network Scotland will offer a more co-ordinated and collaborative approach towards the management of wild deer in Scotland's low ground areas, and where appropriate the formation of new deer management groups. It will provide representation, advice and support, as well as acting as a forum, information exchange, and channel for consultation on future issues and policy for low ground deer managers.

Membership is available on an individual basis at £25.00 with other benefits including two news bulletins per annum, up to eight E-updates per annum, regional events, and an annual LDNS event.
